ToeOFF® 2½ Addition

ToeOFF® 2½ Addition is an ankle-foot orthosis (AFO) that provides support and helps improve gait for individuals with foot drop and mild to moderate proximal involvement. The orthosis is based on the same design and function as ToeOFF® 2½ but features a coloured surface that gives the orthosis an alternative look. ToeOFF® 2½ Addition is available in three colour options: Beige, Black and Camouflage (Camo). The smoother surface allows clothing to slide more easily over the orthosis, while the coloured surface extends all the way to the junction between the strut and the footplate.

ToeOFF® 2½ Addition is supplied with D-ring straps. Pre-applied MikroFix components are positioned on the inside of the orthosis for attachment of the straps and padding.

Recommended Range Of Application

For individuals with foot drop due to conditions such as stroke, multiple sclerosis, post-polio syndrome, muscular dystrophy, spinal cord injuries, traumatic brain injuries, Guillain-Barré syndrome, Charcot-Marie-Tooth disease, myelomeningocele, neuropathy and cerebral palsy.

Contraindications

Foot and/or leg ulcers, moderate to severe edema, moderate to severe foot deformities, and severe proximal deficits (e.g. severe quadriceps spasticity, genu recurvatum, genu valgum or genu varum).
