

A man with a prosthetic leg is standing on a set of stone steps outdoors. He is wearing a black polo shirt, khaki shorts, and white sneakers. He is smiling and leaning on the metal railing of the steps. The background consists of a stone wall and some trees.

“The iFIT is noticeably cooler!  
Decreased stump perspiration  
in comparison to my  
traditional socket.”

- Frank

# Get the right fit today

Today's prosthetics from iFIT—***Immediate Fit, Innovative Technology***—gives prosthetists a new option for their patients. Our unique adjustable design affords one-session fittings for persons with limb loss...getting them back to their adventures quickly, safely, comfortably *and* affordably.

**Adjust with iFIT!**

To better serve you, we've partnered with Allard USA.

# Fit and Aligned in a Single Session

Our new transtibial devices from iFIT Prosthetics® offer adjustability and customization that easily accommodates limb volume changes. Made of injection-molded, advanced polymer materials, it can be mass-produced cost effectively, benefiting those with insurance concerns and providing an affordable option for patients to get a secondary device.

- Adjusts easily with hand tools
- Ideal as a preparatory prosthesis for the first year following amputation
- Perfect solution for patients with kidney or heart disease that experience daily volume changes
- Compatible with many commercially made feet and pylons

LOCKING BUCKLE SYSTEM

CABLES AND EXTENDER FLAP FOR LARGER LIMBS

Uses a simple, front-release button

## COMFORT AND STABILITY

Provides cushioning and comfort with customizable, neoprene-padded liner

## SAFETY-LOCKED BUCKLE SYSTEM

Adjusts to every individual

## PYRAMID ADAPTER

Aligns device properly for greater stability and comfort

## WHAT FIRST-TIME WEARERS ARE SAYING:

“It feels like I’m walking on a pillow!”

“iFIT comes in handy when my stump goes through a hard day’s work and there’s some swelling, which causes pressure in a conventional solid socket. Since the iFIT is adjustable, it’s perfect for times like that—especially after hiking or running.”

“The inside padding prevents rubbing and irritation—you’re really onto something here!”
