Carbon Footplate Rigid

The carbon fiber insole is designed to protect the MTP joints and forefoot by limiting the range of motion (ROM), distributing pressure, and facilitating a natural roll-off. It can be used after immobilization treatment with a postoperative shoe or walker to gradually increase mobility.

For patients with toe amputation, the insole contributes to better balance and a more efficient push-off at the end of the stance phase. It provides extra support and stability where the range of motion in the toe joints needs further restriction.

For optimal comfort and function, the carbon fiber insole should be covered with an insert.

Recommended Range Of Application

Hallux Rigidus, Hallux Limitus, stress fractures and other injuries or arthritis conditions in the forefoot/midfoot, forefoot trauma, toe sprain and toe amputation.

Contraindications

Open ulcers on the foot. Non stable fractures. Weight over 300 lbs/135 kg.

Item No.	Thickness	Size	L/R	Length	Width
280361011	2.0 mm	Small	Left	235 mm	77 mm
280361012	2.0 mm	Medium	Left	255 mm	80 mm
280361013	2.0 mm	Large	Left	275 mm	90 mm
280361014	2.0 mm	X-Large	Left	305 mm	99 mm
280362011	2.0 mm	Small	Right	235 mm	77 mm
280362012	2.0 mm	Medium	Right	255 mm	80 mm
280362013	2.0 mm	Large	Right	275 mm	90 mm
