Selection Wrist Short

SELECTION Wrist Short is a flexible, elastic wrist orthosis with a textile reinforcement on the volar side. It is low cut in the thumb area to follow the hands natural bend and allow full movement of the thumb. Lacing closure makes it easy to don and doff with one hand. The lacing comes from the ulnar side so the risk of misalignment of the thumb is reduced. Thumb grip is adjustable. Can adjust the shape slightly by trimming with scissors. It is intended to be used when the wrist needs support and off-loading in cases such as rheumatic disorders, soft tissue injuries. Also, for attritional wear.

Made with the airy and comfortable SELECTION material with all the functionality this incorporates.

Recommended Range Of Application

Supports the wrist after injuries, operations, casting, hypermobility, rheumatic problems, chronic pain, osteoarthritis, overloading. Can also be used in preventive purpose during heavy or repetitive movements.

Measurements

Wrist circumference.
