ToeOFF® 2.0

ToeOFF® 2.0 is an ankle-foot orthosis (AFO) for individuals with foot drop and mild to moderate proximal involvement. The orthosis is designed to provide support, improve toe-off and contribute to a smoother, more stable gait pattern. It is lightweight and has a low-profile design, making it discreet to wear under clothing. ToeOFF® 2.0 has a standard toe lift and a heel height of 12–15 mm, depending on size.

All foot drop 2.0 Allard AFOs come with a Starter Interface Kit which includes one Starter SoftKIT™ and two Tibia Pads! You asked, we listened! With more gently contoured "wings", pre-attached MikroFix™, straps with alligator tabs and D-Rings and more, we are sure you will love our 2.0 models.

Recommended Range Of Application

For individuals with foot drop due to conditions such as stroke, multiple sclerosis, post-polio syndrome, muscular dystrophy, spinal cord injuries, traumatic brain injuries, Guillain-Barré syndrome, Charcot-Marie-Tooth disease, myelomeningocele, neuropathy and cerebral palsy.

Contraindications

Foot and/or leg ulcers, moderate to severe edema, moderate to severe foot deformities, and severe proximal deficits (e.g. severe quadriceps spasticity, genu recurvatum, genu valgum or genu varum).
