BlueROCKER® 2.0

BlueROCKER® 2.0 is a highly stable ankle-foot orthosis (AFO) for individuals with foot drop, moderate to severe ankle instability, or moderate to severe proximal involvement. It is particularly suitable for individuals with bilateral leg weakness and can also be used for partial foot amputations, with the most proximal level being Chopart.

The orthosis provides support, improves toe-off and contributes to a more stable gait pattern. It features a smooth surface and a heel height of 12–15 mm, depending on size. All Allard AFO 2.0 comes with a Starter Interface Kit which includes one Starter SoftKIT™ and two Tibia Pads! You love the ToeOFF® 2.0, so upon your request, the same benefits are now in BlueROCKER® 2.0! With more gently contoured "wings", pre-attached MikroFix, straps with alligator tabs and D-Rings, and more, we are sure you will love our 2.0 models.

Recommended Range Of Application

For individuals with foot drop due to conditions such as stroke, multiple sclerosis, post-polio syndrome, muscular dystrophy, spinal cord injuries, traumatic brain injuries, Guillain-Barré syndrome, Charcot-Marie-Tooth disease, myelomeningocele, neuropathy and cerebral palsy.

Contraindications

Foot and/or leg ulcers, moderate to severe edema, moderate to severe foot deformities, and severe proximal deficits (e.g. severe quadriceps spasticity, genu recurvatum, genu valgum or genu varum).

Item No.	Product Description	Size	L/R
289401010	BlueROCKER® 2.0 w/o D-Ring	X-Small	Left
