ToeOFF® 2.0 Addition

All foot drop 2.0 Allard AFOs come with a Starter Interface Kit which includes one Starter SoftKIT™ and two Tibia Pads! We now offer the same great features of the ToeOFF® 2.0 with a newly designed surface in Birch. Our newly designed Birch color option has a unique color blend that allows it to blend in with various different wardrobe options. In ADDITION to added style options, the ToeOFF® 2.0 Addition provides a smooth surface that extends all the way down the strut to the foot plate allowing pant legs to slide easily over the brace. The D-Ring style nylon straps have a metal D-Ring for strength and score lines along the length of the straps so they can be trimmed easily.

For more color options check out the ToeOFF® 2 ½ Addition page (link below). The available options are Black, Birch or Camouflage. All 2½ models of Allard AFO have the same dynamic function and stability as ToeOFF® 2.0 with the exception that the 2½ has a lower heel height of 7 mm, to adapt to modern shoes. The toe lift is also lower which results in more space in the toe box.

Recommended Range Of Application

Foot drop in combination with no spasticity to moderate spasticity. Limb proprioception deficit and mild proximal deficit. Partial foot amputations.

Contraindications

Severe edema, leg ulcers, moderate to severe spasticity.
