ToeOFF® 2½

ToeOFF® 2½ is an ankle-foot orthosis (AFO) for individuals with foot drop and mild to moderate proximal involvement. The orthosis provides support and contributes to a smoother, more stable gait pattern and improved toe-off.
ToeOFF® 2½ is lightweight and has a low-profile design, making it discreet to wear under clothing. The 7 mm heel height provides a good fit in modern, lower-heeled shoes. The reduced curvature at the front of the footplate provides more space in the toe box for improved shoe fit. The 7 mm heel height and increased toe box clearance are consistent with the existing ToeOFF® 2½ product description.
ToeOFF® 2½ is supplied with pre-applied Microfix to simplify the attachment of padding and a complete strap set, available with or without a D-ring. The straps are made from a strong, durable material and can be applied on either the interior or exterior side of the AFO.

Recommended Range Of Application

For individuals with foot drop due to conditions such as stroke, multiple sclerosis, post-polio syndrome, muscular dystrophy, spinal cord injuries, traumatic brain injuries, Guillain-Barré syndrome, Charcot-Marie-Tooth disease, myelomeningocele, neuropathy and cerebral palsy
ToeOFF® 2½ is designed to support gait in conditions such as Posterior Tibialis Tendon Dysfunction (PTTD) and toe amputations. ToeOFF® 2½ can be used for toe amputations.

Contraindications

Foot and/or leg ulcers, moderate to severe edema, moderate to severe foot deformities, and severe proximal deficits (e.g. severe quadriceps spasticity, genu recurvatum, genu valgum or genu varum)
