BlueROCKER® 2½

BlueROCKER® 2½ is a highly stable ankle-foot orthosis (AFO) designed for individuals with foot drop, moderate to severe ankle instability, and moderate to severe proximal involvement. The orthosis is designed to provide support, improve toe-off and contribute to a more stable gait pattern.
BlueROCKER® 2½ has a heel height of 7 mm and a lower toe lift than BlueROCKER® 2.0, providing more space in the toe box and improved shoe fit. The BlueROCKER® 2½ has all MikroFix pre-applied to simplify fitting of the padding. The strap solution is the same as on 2.0, made from a durable and strong material. The straps can be applied on the interior or external side of the AFO. It is always important to adapt any Allard AFO to the heel height of the shoe. Read more about this in the Allard AFO Professional Instructions.

Recommended Range Of Application

For individuals with foot drop due to conditions such as stroke, multiple sclerosis, post-polio syndrome, muscular dystrophy, spinal cord injuries, traumatic brain injuries, Guillain-Barré syndrome, Charcot-Marie-Tooth disease, myelomeningocele, neuropathy and cerebral palsy

Contraindications

Foot and/or leg ulcers, moderate to severe edema, moderate to severe foot deformities, and severe proximal deficits (e.g. severe quadriceps spasticity, genu recurvatum, genu valgum or genu varum).

Item No.	Product Description	Size	L/R
289701010	BlueROCKER® 2 ½ w/o D-Ring	X-Small	Left
289701011	BlueROCKER® 2 ½ w/o D-Ring	Small	Left
289701012	BlueROCKER® 2 ½ w/o D-Ring	Medium	Left
