BlueROCKER® Short

BlueROCKER® SHORT is specifically developed to accommodate individuals with a shorter stature, slightly broader shaped tibia, and a wider foot at the metatarsal area. Tibia padding should always be used for patient comfort. This model has a heel height of 7 mm in all sizes.

Recommended Range Of Application

Foot drop in combination with weak plantar flexors, and in some cases limited knee control. Intended for moderate to severe spasticity and proximal deficits, impairment in multiple leg muscle groups and partial foot amputation. Also for bilateral wearers and balance issues.

Contraindications

Should not be used when patients present with foot and/or leg ulcers, moderate to severe edema, moderate to severe foot deformities, severe proximal deficits or severe spasticity.
